

MARJORIE BIAUNÉ*

*21 years old | Master1 - Graphic design | ÉSAD Pyrénées, Pau

Interested in programming languages and open source software, I exploit the flexibility of these tools to create functionalities according to needs. Looking for a more ethical and open design, which meets the needs of the user/reader, I multiply my techniques and supports: website, poster, fanzine, portfolio, web-to-print edition. My work is accompanied by a curiosity for the ways of thinking and the values that develop in digital culture, thus, I position myself as a liberated, free web designer.
